

CLAIMS

Please amend the claims as follows:

1. (Currently Amended) A system for delivery of product units from a vending machine to a customer, comprising:
 - a control central; and
 - a closed vending machine comprising a control unit ~~being arranged~~ configured to control the conditions for delivery of the product units from the closed vending machine; and also configured to register information about the product content in the closed vending machine, ~~characterized in that wherein~~ the control central is ~~arranged~~ configured to continuously collect information about the product content from the control unit and is ~~set-up~~ configured to control the conditions of delivery in the closed vending machine for each ~~specific~~ customer, ~~based on, for example, customer information, time, location,~~ wherein the conditions of delivery are sent to the control unit.

2. (Currently Amended) A system according to claim 1, ~~characterized in that wherein~~ the control central is ~~arranged~~ configured to continuously register ~~all the products units~~ that are delivered to ~~each individual~~ the customer, and wherein ~~each the product unit~~ that the customer buys is debited by the control center automatically, ~~immediately~~ after the purchase.

3. (Currently Amended) A system according to claim 1, ~~characterized in that wherein~~ the control unit is programmed via the control central to regulate which of the products units that can be delivered from the vending machine; and which of the products units that are blocked ~~for~~ from delivery.

4. (Currently Amended) A system ~~according to~~ as in any one of the preceding claims, ~~characterized in that wherein~~ the control central comprises arrangements to rebate and/or favor individual guests the customer for some or all products in the ~~mini bar-closed vending machine~~.

5. (Currently Amended) A system according to claim 1, ~~characterized in that~~ wherein the closed vending machine is arranged configured to be operated by a feed-unit, wherein said feed-unit is selected from a group comprising such as a keyboard, a remote control unit ~~or~~ and another wireless unit.

6. (Currently Amended) A system according to claim 1, ~~characterized in that~~ wherein a TV set is connected to the control central, and the vending machine is arranged to be operated via the remote control of the TV set.

7. (Currently Amended) A system according to claim 1, ~~characterized in that~~ wherein access to the vending machine is conditioned by the use of a correct room key, wherein the access to the room gives a corresponding access to the closed vending machine against a simultaneous invoicing of all withdrawals.

8. (Currently Amended) A system according to claim 5, ~~characterized in that~~ further comprising:

a card reader coupled to the vending machine comprises a card reader, wherein said card reader reads at least one of a magnetic card or and another storing body and is used in combination with a code that can be keyed into the feed unit to activate the closed vending machine.

9. (Currently Amended) A system according to claim 1, ~~characterized in that~~ wherein said conditions of delivery that are controlled comprise delivery of the products units which are subjected to restrictions ~~according to the Law, such as of~~ at least one of age limits and ~~or~~ time related restrictions.

10. (Currently Amended) A system according to claim 9, ~~characterized in that the system comprises~~ further comprising:

a display coupled to the closed vending machine and configured shaped analogously to a TV screen to show selection possibilities and also to present information such as advertisements and the like.

11. (Currently Amended) A system according to claim 1, wherein the closed vending machine is located in a hotel room, and ~~that~~ the control central is operated from the hotel reception by an operator.

12. (Currently Amended) A system for delivery of product units from a lobby vending machine to a plurality of customers, comprising:

a control central; and

a closed vending machine, placed in a common area, comprising a control unit ~~being arranged~~ configured to control the conditions for delivery of the product units from the vending machine, and ~~also~~ configured to register information about the product content in the closed vending machine, wherein the control central controls the conditions for delivery in relation to which single products units ~~that~~ can be delivered from the vending machine to ~~each individual~~ the customer, and which ~~that~~ product units are prevented from being delivered ~~are controlled from a control central~~.

13. (Currently Amended) System according to claim 12, wherein the closed vendor machine is located in a hotel's facilities; selected from the group consisting of such as lobbies, well-being departments, spa and massage parlors, swimming pools, fitness rooms, squash and tennis courts, discos, restaurants, internet cafes, and cinemas, etc., ~~wherein these comprise corresponding card readers that can be used in a vending machine and lobby vending machine, respectively, and in connection with travel terminals, companies, schools and other relevant areas.~~

14. (Currently Amended) Method for delivery of product units from a vending machine to a customer, comprising:

a control central; and

a vending machine comprising a control unit that controls ~~the~~ conditions for delivery of the product units from the vending machine; and ~~also~~ registers information about product stock in the vending machine, ~~characterized in that~~ wherein the control central continuously collects information about product stock from the control unit and wherein the ~~delivery~~ conditions for

delivery in the vending machine are controlled ~~in that~~ by an operator that inserts conditions for a customer ~~which~~ that are sent to the control unit.

15. (Currently Amended) Method according to claim 14, ~~characterized in that~~ wherein the control central registers the products units that are delivered to ~~each individual~~ the customer continuously, and debits the customer automatically, ~~immediately~~ after the purchase of the product unit.

16. (Currently Amended) Method according to claims 14- or 15, ~~characterized in that~~ wherein the ~~mini-bar~~ vending machine releases the product unit from the ~~mini-bar's~~ vending machine stock and delivers the chosen product unit to the customer via a delivery chute if the control of the control unit cancels the blocking function.

17. (New) System according to claim 12, wherein the closed vending machine is located in public areas selected from the group consisting of travel terminals, companies, and schools.

18. (New) System according to claim 12, further comprising:
a corresponding card reader coupled to the vending machine, wherein said card reader reads at least one of a magnetic card ~~or~~ and another storing body and is used in combination with a code that can be keyed into the feed unit to activate said closed vending machine.
